# GemEx Engine®

Occupancy Analytics

AT A GLANCE

The GemEx Engine® workplace experience platform is an easy-to-use configurable analytics dashboard for Data Analysts, Facilities Staff and Real Estate Managers.
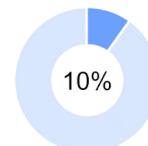

Meaningful Analysis

- Meeting Room & Desk Utilisation
- View Trends & Timelines
- Peak Vs Average Usage
- Ranked Assets
- Frequently Vs Rarely Used Spaces
- Heatmap Visualisation

WHAT IS POSSIBLE

- Configure for whole countries, regions, or specific buildings.

- Filter by data range and working hours, with options to exclude bank holidays.

- Customise visual bar charts to branded colours

40%

Peak desk occupancy

10%

Average desk occupancy

HEATMAP

Visual analytics tool with colour-coded heatmap displaying space usage, aiding in identifying areas that are underutilised or overcrowded. Optimise your space usage accordingly.

BENEFITS

1 **Answer bespoke workspace questions**
You can set filters, group data by custom categories, and adjust the date and working hours for specific concerns.

2 **Identify trends to improve space usage**
With live and historical occupancy data, discover insights into how employees use the space and design your future workspace.

3 **Give detailed evidence for reports**
With configurable data and a variety of chart types, you can back up business descisions and reports with digestable visuals.
